Professional Summary

Full Stack Developer with 5 years of experience in strategic projects and mission-critical systems. Specialized in Java Spring Boot and Angular, with solid expertise in React, Node.js, Docker, Kubernetes, and Cloud (AWS, Azure).

Strong background in backend and frontend optimization, test automation, and development of scalable applications with a focus on quality, security, and engineering best practices.

Contributed to high-impact projects, including the National Register of Missing Persons (CNPd – Ministry of Justice), as well as initiatives for Banco Votorantim and CIEE-RS, ensuring performance, scalability, and efficient system integration.

Professional Experience

Qintess – Full Stack Developer

Oct/2024 – Present

- Developed critical solutions for the Ministry of Justice, including APIs and system integrations.
- Built scalable applications with Java, Spring Boot, and Angular.
- Implemented CI/CD pipelines with Docker, Kubernetes, and Azure DevOps, ensuring continuous delivery and high quality.
- Optimized SQL queries and monitored applications using ElasticSearch.
- Introduced unit and integration testing (JUnit), improving system reliability and security.

CWI Software – Full Stack Developer

Aug/2020 – Sep/2024

- Developed and maintained systems for Banco Votorantim and CIEE-RS.
- Built applications with Java, Spring Boot, Angular, and React in a microservices architecture.
- Worked with Kafka messaging and application monitoring using Grafana and Prometheus.
- Integrated with both SQL and NoSQL databases, optimizing queries for performance.
- Managed cloud infrastructure in AWS and Azure, with Docker, Kubernetes, and DevOps practices (Jenkins, Git).
- Automated testing with JUnit and Jest and actively participated in code reviews.

Education

Universidade La Salle

Associate Degree in Systems Analysis and Development – *Feb/2022 – Jul/2024*

IFSUL – Instituto Federal Sul-rio-grandense

High School with IT specialization – *Feb/2017 – Dec/2021*

Technical Skills

- **Programming Languages:** Java, JavaScript, TypeScript
- **Frameworks & Libraries:** Spring Boot, Angular 2+, React.js, Node.js
- **Databases:** SQL (SQL Server, MySQL, PostgreSQL), NoSQL (MongoDB), ORM (Hibernate, TypeORM)
- **Agile Methodologies:** Scrum, Kanban
- **Testing:** Unit Testing, Integration Testing
- **DevOps & Infrastructure:** Docker, Kubernetes, Helm, CI/CD (Jenkins, GitHub Actions, GitLab CI)
- **Cloud Platforms:** AWS (ECS, EKS, Lambda), Azure (Azure DevOps)
- **Messaging:** Kafka, RabbitMQ
- **Observability:** Prometheus, Grafana, ElasticSearch, OpenTelemetry
- **Security:** JWT, OAuth2
- **Software Design & Architecture:** OOP, Design Patterns, Clean Code, SOLID, Data Structures, Microservices Architecture, SonarQube

Languages

English: Advanced (C1)
